Vladimir Arnautov

2021-08-07

## 1 Introduction and package description

Non-compartment anlysis software.

See documentation: <https://pharmcat.github.io/MetidaNCA.jl/dev/>

### 1.1 Validation purpose

The main validation purpose is confirmation by examination and provision of objective evidence that software specifications conform to user needs and intended uses, and that the particular requirements implemented through software can be consistently fulfilled.

### 1.2 Requirements

- Julia 1.5.\* (or higher) installed
- Julia packages from dependence list installed (see [Project.toml](#))

### 1.3 Developer software life cycle

- Development stage
- Testing procedures development
- Performing testing procedures on local machine
- Push to master branch
- Performing testing procedures with GitHub Actions
- Make pull request to the official registry of general Julia packages (if nessesary)
- Make release (if previous completed)

### 1.3.1 Versions

- X.Y.Z - patch release (no breaking changes)
- X.Y.# - minor release (may include breaking changes)
- X.#.# - major release (breaking changes, changes in public API)
- 0.#.# - no stable public API
- $\geq 1.\#.\#$  - stable public API

## 1.4 Build support

### 1.4.1 Tier 1

- julia-version: 1.5, 1.6
- julia-arch: x64
- os: ubuntu-18.04, macos-10.15, windows-2019

## 2 Installation

### 2.1 System information

- Julia version: v"1.4.2"
- Current machine: "x86\_64-pc-linux-gnu"

### 2.2 Installation method

MetidaNCA.jl can be installed by executing the following command in REPL.

```
import Pkg; Pkg.add("MetidaNCA")
```

### 2.3 Version check

The installation process is checking within each testing job via GitHub Actions. Also GitHub Action [chek](#) performed before merging into JuliaRegistries/General repository (see [Automatic merging of pull requests](#)).

Current package version:

"0.1.6"

## 3 Operation qualification

This part of validation based on testing procedures entails running software products under known conditions with defined inputs and documented outcomes that can be compared to their predefined expectations. All documented public API included in testing procedures and part of critical internal methods.

### 3.1 Coverage

Code coverage report available on [Codecov.io](https://codecov.io). Test procedures include all public API methods check.

- Coverage goal:  $\geq 90.0\%$

### 3.2 Data

Validation data available in the repository and included in the package. See Appendix 1.

### 3.3 Testing results

```
Pkg.test("MetidaNCA")
```
